

How to achieve and maintain employability in an ever faster changing environment.

**NOBLE BANADDA INTERNATIONAL
SUSTAINABILITY SUMMER SCHOOL**

Could Darwin be right in the 21st Century?

- **Survival of the fittest – a story of misunderstandings**

- Many people believe, that only the strong can survive, but, what Darwin really meant when he „borrowed,, the term from Herbert Spencer, a philosopher, was in short:
- The struggle for existence is an ongoing process of learning and adapting. Some succeed, others don't.
- Which ones will you belong to?

Your future self

- Where do you see yourself professionally in 10 years?
- What could change between now and then?
- What job will you have?
- Which skills do you need?

Why Employability matters

The World of Work is changing.

What is driving Change?

- Artificial Intelligence
- Globalization
- Digitalization
- Sustainability

What is lifelong employability?

The ability to:

- Find employment
- Maintain employment
- Adapt to change
- Develop throughout your career

That means:

- Staying relevant
- Staying adaptable
- Staying employable

The Employability Formula

A strong career requires

- Professional Skills
- Personal Strengths
- Social Competencies
- Continuous Learning

Which area is currently your strongest?

The four pillars – Pillar 1: Professional Competence

- Technical expertise
- Industrial Knowledge
- Qualifications

Ask yourself:

- Am I up to date in my field?
- Which new skills are emerging?

The four pillars – Pillar 2: Personal Competence

- Self management
- Adaptability
- Resilience
- Initiative

Employers value

➔ People who can learn, adapt and remain effective under pressure.

The four pillars – Pillar 3: Social Competence

- Teamwork
- Communication
- Networking

The four pillars – Pillar 4: Learning Competence

- Curiosity
- Learning Agility
- Continuous Development
- Openness to Feedback

Future trends – what will shape careers?

Major trends:

- Artificial Intelligence
- Automation
- Green Jobs
- Global Collaboration
- Data-Driven Decision-Making

Skills for the future

- Problem solving
- Critical thinking
- Creativity
- Communication
- Collaboration
- Digital Literacy
- Adaptility
- Emotional Intelligence

The pyramid of skills

In order to evaluate your current skills, you can put them into 4 lists:

Final, top, fourth level: what I'm expert in

Third level: what I'm good at (skills with decent knowledge, but nowhere near expertise)

Second level: what I can do (skills with basic practical experience)

First level: what I understand (skills with basic theoretical understanding, but no practical experience)

Let's start talking

- The jobs of the future belong to people who never stop learning.
- Never stop being a beginner.
